

Greater Manchester Common Standards for Population Health

Introduction

In March 2017, following a <u>review of the current public health system across Greater Manchester</u>, Greater Manchester Health & Social Care Partnership agreed to a set of proposals to facilitate the creation of a unified population health system to support the delivery of the <u>Greater Manchester Population Health Plan</u> at pace and scale.

This included a commitment to the reduction of unwanted variation in standards and outcomes and an ambition to see a more consistent adoption of evidence-based practice and the use of benchmarking data. This confirms the vision to drive improvements in population health across and within Greater Manchester (GM) and through the 10 GM localities, reducing inequalities and setting outcomes that are aligned to place based priorities.

The creation of a Greater Manchester Population Health Outcomes Framework (and accompanying on-line <u>Dashboard</u>) enables us to focus upon the key Population Health outcomes which adversely impact upon the health and wellbeing of the GM population and seeks to place focus and emphasis on a number of key indicators.

The Greater Manchester Population Health Outcomes Framework has been developed in partnership, and through a process of engagement and co-design, with key stakeholders from across the health and social care system and the wider Public Service. The Framework, formally signed-off by the Greater Manchester Population Health Programme Board in March 2018, contains a suite of outcomes and output measures which are integral to the single integrated assurance process.

Greater Manchester Common Standards for Population Health

In order to reduce variance, enhance consistency and improve population health outcomes across GM, a programme of work has been undertaken to develop a suite of core **Common Standards for Population Health in GM**. Existing and new GM task groups have worked to consolidate existing standards, evidence and guidance to develop a suite of evidence-based standards for key areas of Population Health activity. The Standards are designed to support localities to achieve the best health gain for their population, and to reduce unwanted variation in population health outcomes across Greater Manchester.

There is no compulsion for localities to adopt and implement GM Common Standards for Population Health. However, this document provides localities with an evidence-based tool to enable population health / public health practitioners to review current local activity and identify any gaps in evidence. This first publication includes standards for the following 7 population health themes and additional standards will follow in due course:

- Mental Health and Wellbeing
- Oral Health
- Sexual and reproductive health
- · Drug and Alcohol service standards
- Physical activity
- Health Protection
- Tobacco Control

GM Common Standards for Population Health have been developed through a process of co-design and agreement with subject matter experts and representatives from all 10 GM localities. They draw on existing standards such as those produced by NICE and Primary Care, and the development of new standards that will drive improvements in outcomes and quality. Each suite of Standards describes the activity required in any defined place / locality to support continuous improvement in population health outcomes.

Details of all GM groups been consulted and contributed to the development of these standards are recorded in this document. Links to evidence-based guidance (such as NICE, PHE and other professional bodies) are embedded for reference.

Each suite of topic-based standards provides a clearly defined outcome and method for measuring impact though it is acknowledged that for some standards appropriate impact measures are yet to be defined. Phase 2 of the development of the GM Population Health Outcomes Framework seeks to develop additional measures / metrics.

GM Common Standards for Population Health will be reviewed and updated regularly by the GM Common Standards Network Group* should existing evidence / guidance change. The group will meet again following the publication of PHE / ADPH Core Principles for Quality Improvement in Public Health: What Does Good Look Like. (expected 2019). Further Population Health common standards will be developed for additional population health themes as required.

*GM Common Standards Network Group is chaired by a Consultant in Public Health and consists of lead officer(s) for each topic-based suite of GM Population Health Common Standards.

Greater Manchester Common Standards for Population Health: Prescribed and nonprescribed local authority public health functions

In addition to topic-based standards, a suite of GM Common Standards has been developed for prescribed and non-prescribed local authority public health functions. These detail headline standards for the prescribed functions that are outlined in the <u>Public Health Ring fenced Grant Guidance for 2018/19 to Local Authorities</u>.

Headline GM Common Standards for Population Health are intended to provide guidance on action to be taken by localities in each prescribed and priority non-prescribed areas. In addition to the prescribed functions, standards are included relating to *Drug and Alcohol services*, *Tobacco Control*, *Mental Health and Wellbeing* as these are also key functions related to the Public Health Grant and are of significance to the improvement of GM population health outcomes.

Headline Population Health GM Common Standards have been chosen based on sound evidence and reasoning on how we can best meet the prescribed function and seek to achieve population health improvement for residents within Localities and across GM.

Self-evaluation matrix

To support localities to review current activities a simple self-evaluation matrix is embedded throughout this document. Positioning current activity using this scale will help professionals identify areas for improvement and to track progress over time. Again, there is no compulsion to use this matrix and localities may wish to use alternative methods to assess and review local activity.

Score	Assessment	Findings / Conclusion	Action Required
1	Standard not met	Significant gaps / weaknesses exist (generally non-compliant)	Actions are identified to secure improvements and move towards compliance.
2	Standard partially met	Some gaps / weaknesses exist (partial compliance)	Evidence is signposted in support of areas of compliance. Actions are identified to secure improvements and achieve compliance.
3	Standard fully met	Very few or no gaps / weaknesses exist (compliant)	Evidence is signposted in support of areas of compliance.

Greater Manchester Population Health Common Standards

Table of contents

Theme	Page
Prescribed and non-prescribed public health functions	<u>5 - 6</u>
Mental Health and Wellbeing	<u>7 - 14</u>
Oral Health	<u>15 - 20</u>
Sexual and reproductive health	<u>21 - 28</u>
Drug and Alcohol service standards	<u>29 - 43</u>
Physical activity	<u>44 - 49</u>
Health Protection	<u>50 - 58</u>
Tobacco Control	<u>59 - 65</u>

1. Greater Manchester Common Standards for prescribed and non-prescribed public health functions

	Local Authority	Population Health Common Standard				Measurement
	Function		1	2	3	
	Statutory Post	Locality has a named Director of Public Health				Named Director of Public Health / Population Health
	Sexual health	Timely open access to STI advice and treatment service (appointment offered within 48 hours)				New HIV diagnosis rate /
	services - STI testing and treatment	Personalised risk reduction support and information for all who attend sexual health services & their partners				100,000 people aged 15+
		Routine offer of an HIV test in high prevalence areas and a regular, targeted offer to those in high risk groups				
PRESCRIBED FUNCTIONS	Sexual health services - Contraception	All under 18s within a locality are encouraged to access a sexual & reproductive health service or GP before engaging in sexual activity				
IBED FUR		Open access to specialised services for young people up to the age of 19				Total Prescribed Long Acting Reversible Contraception (LARC) (Excluding Injections)
PRESCR	·	All women (15-44 years old) are fully informed about and, if clinically appropriate, encouraged to use Long-acting Reversible Contraception (LARC) as their form of contraception				
		For all women having a LARC removed and requiring contraception to have immediate access to an alternative, reliable method of contraception				
	NHS Health Check	All eligible individuals aged 40-74 to be offered an NHS Health Check once in every 5 years, with pilot areas prioritising people at greater risk, and for each individual to be recalled every 5 years if they remain eligible				Under 75 mortality rate from
	programme	All identified at high risk to receive the advice and support to manage that risk				CVD considered preventable
	Public Health advice to NHS Commissioners	Public Health specialist advice and support is available to NHS Commissioners, integrated commissioners and care organisations in all Localities and at a GM level				n/a

SNI	National Child Measurement Programme	Completion of the National Child Measurement Programme with above average uptake Documented service offer for children and families identified as being overweight,				Prevalence of overweight children
PRESCRIBED FUNCTIONS		obese or underweight identified through the NCMP				(including obese) as measured by NCMP
3ED	D					Breastfeeding Initiation
ESCRIE	Prescribed Children's 0-5	Commissioning and delivery of the national 0-5 Healthy Child Programme in line with				Proportion of 5 year old children free from dental decay
PR	services	agreed targets				% of children achieving a good level of development at the end of reception
	Drug and Alcohol	All localities to demonstrate how they are meeting the local needs for the take up and the outcomes of its drug and alcohol treatment services				Alcohol-related hospital admissions (narrow definition)
		All pregnant women who smoke are referred to services which can help them to quit				
NS	Tobacco	during their pregnancy				% of women who smoke at time of delivery; Smoking prevalence
FUNCTIONS		Publicised arrangements in place for smokers to access pharmacotherapy and motivational support in all areas (Including advice about nicotine inhaling products)				in adults - current smokers (APS)
RIBED PH	Oral Health	Commission oral health preventive programmes in line with Commissioning Better Oral Health guidance and ensure oral health is embedded within children's services				Proportion of 5-year-old children free from dental decay
NON-PRESCRIBED PH	Mental Health and Wellbeing	Localities to (1) support GM Suicide Prevention Strategy & GM/Locality suicide prevention action plans in place and adopt Mentally Healthy Schools and Colleges principles				Suicide Prevalence
ON	Physical Activity	Every community will offer a range of high quality spaces and opportunities for people to live active lives, supported by welcoming leaders and suited to different				% of GM population who are Active or Fairly Active
		motivations, attitudes and interests.				% of physically inactive adults (>30 minutes per week)

Outcome measures affected in GM Population Health Outcomes Framework:

4.10 Suicide Prevalence

Improving child and adult mental health, narrowing their gap in life expectancy, and ensuring parity of esteem with physical health is fundamental to unlocking the power and potential of GM communities. Shifting the focus of care to prevention, early intervention and resilience and delivering a sustainable mental health system in GM requires simplified and strengthened leadership and accountability across the whole system. Enabling resilient communities, engaging inclusive employers and working in partnership with the third sector will transform the mental health and wellbeing of GM residents.

We propose a whole system approach that includes involvement from the independent and third sector, to improve the mental health and wellbeing of individuals and their families, supported by resilient communities, inclusive employers and services that maximise independence and choice.

- Children and Young People's mental health forms an integral part of our overall strategy. We will use the opportunities through devolution to collectively respond to the challenges outlined within Futures in Mind and in doing so transform the provision of services for the young people in GM.
- We will promote employment for people with mental health problems and provide timely and effective support to help people stay in employment through building on the current GM Working Well whole population approach.
- We will support those most vulnerable in society to help reduce the risk of developing poor mental health, and those with existing mental health conditions from deteriorating further. In doing this we will build on GMs existing approach to supporting people with complex needs with a particular focus on looked after children, child sexual exploitation, those with learning difficulties and disabilities.

This document provides a list of standards and measures and core outcomes linked to the <u>Greater Manchester Mental Health Strategy</u> and GM Health and Social Care Partnership Population Health Plan. Commissioners, providers and health and social care professionals are asked to:

- Review current practice against these standards
- Identify gaps in the evidence and implement these standards
- Develop actions to address these gaps and provide evidence and feed into the development of local transformation plans
- Agree a small number of KPIs to feed into the performance frameworks for local care organisations.

Improving the Health of the GM Population and Reducing Health Inequalities across GM "I" Statement: "I will live a long and healthy life in Greater Manchester "

OUTCOME	COMMON STANDARD	SCORE			METHOD OF MEASURING IMPACT
OOTOOME	COMMON STANDARD	1	2	3	METHOD OF MEADORING IN ACT
Support the delivery of the GM Suicide Prevention strategy and the 10% reduction in suicide rates (baseline 2016/7) by 2020	All Localities will have a suicide prevention action plan in place.				Age-standardised mortality rate from suicide and injury of undetermined intent per 100,000 population
	All health and social care staff frontline staff to receive the				Presence of mental health and suicide awareness training and mental health literacy within local health and social care transformation plan
Reduction in self harm and suicide	following training as part of workforce development mental health awareness, suicide awareness and mental health				% of workforce who have received defined training
	literacy training				Staff feedback confirming mental health/suicide training
					Locality Transformation Plans for Health and Social Care address:
Public mental health, parity of esteem and health	assessment (JSNA) to				Public mental health: primary/secondary prevention and recovery interventions
inequalities is a strategic consideration within overarching plans for health	health and the public health outcomes framework. JSNAs				Parity of esteem: Annual Health Checks, Smoking, Weight, Drugs & Alcohol
and social care transformation and is	should include parity of esteem, health inequalities and address				Health inequalities: Healthy Equity Audit for people with SMI
embedded within service provision	mental and physical health needs of children and young				The impact will be measured by:
provision	people				The reduction of specific physical health problems
					Increased physical health assessments

STRATEGIC OUTCOME: Give every GM child the best start in life

"I" Statement: "I will make sure that more children in GM of all ages and backgrounds will have better wellbeing and good mental health"

			SCORE			
OUTCOME	COMMON STANDARD	1	2	3	METHOD OF MEASURING IMPACT	
Mentally Healthy Schools and Colleges	Develop strategic framework based on whole school /college and approach with principles that focus on leadership and management, curriculum, working with students and parents, staff development and wellbeing, targeted interventions for Children and Young People at risk of poor emotional and mental health alongside universal mental health promotion approaches				% of schools and college in the borough participating in recognised whole school / college programme and Hospital admissions as a result of self-harm (10-24 years)	

STRATEGIC OUTCOME: Live Well - Ensure every GM resident is enabled to fulfil their potential

"I" Statement: "I will maintain good mental health and wellbeing and have access to timely early preventative interventions"

OUTCOME	COMMON STANDARD	SCORE			METHOD OF MEASURING IMPACT
OUTCOME	COMMON STANDARD	1	2	3	METHOD OF MEASURING IMPACT
Mental health and wellbeing should be embedded across all the local authority's areas of responsibility, including housing, education, community safety and planning.	All Local Authorities will have at least one elected member mental health champion				Number of LAs with at least one mental health champion Number of mental health champions in LAs
Individuals return to, or remain in work	Support to retrain, retain or gain employment will be part of care plans for all accessing primary, secondary MH services and commissioned VCSE mental health services				Reduced gap in employment rate for those in contact with secondary mental health services and the overall employment rate (PHOF 1.08iii) Secondary mental health to measure: Length of time people are off work Percentage of successful return to work Primary care to: routinely record Employment / benefit status make appropriate connections /referrals to services
Improved quality of life for the individual with SMI including greater independence, improved health, greater choice of options on where and how to live and lessened dependence	People with SMI will be supported to find secure accommodation				% of adults (age 18-69) who are receiving secondary mental health services on the Care Programme Approach recorded as living independently, with or without support

STRATEGIC OUTCOME: Live Well - Ensure every GM resident is enabled to fulfil their potential (continued)

"I" Statement: "I will maintain good mental health and wellbeing and have access to timely early preventative interventions"

			SCORE		
OUTCOME	COMMON STANDARD	1	2	3	METHOD OF MEASURING IMPACT
Improvement the physical health of people living with mental health problems	Robust pathways between mental health services and life style interventions e.g. smoking, weight management, dental and oral health and physical activity				Excess under 75 mortality rates in adults with serious mental illness: ratio of observed to expected mortalities (expressed as a percentage)
Prevention of physical ill health, increasing early detection of illness and reducing premature morbidity, enabling people to live healthier and longer lives.	All mental health staff will receive competency-based behaviour change training to address physical health needs are assessed and responded too.				% of mental health staff receiving competency-based behaviour change training to address physical health needs
Multi-faceted campaigns including anti-stigma, targeted work with	All Statutory organisations and key partners will sign up to the Time to Change programme				% of time to change workplaces in the
organisations and BAME communities	Any local surveys to include questions relating to attitudes to mental ill-health and mental wellbeing				borough

STRATEGIC OUTCOME: Age Well – Every adult will be enabled to remain at home, safe and independent for as long as possible
"I" Statement: "As my needs change I will talk about my feelings, keep active, learn, ask for help and participate in social and community life to maintain good mental health "

OUTCOME	COMMON STANDARD	SCORE			METHOD OF MEASURING IMPACT
OUTCOME	COMMON STANDARD	1	2	3	METHOD OF MEASURING IMPACT
Reduction in social isolation and Loneliness	Develop local social prescribing offer targeting older people that addresses social isolation and loneliness				% of adult social care users who have as much social contact as they like (<u>Public Health Outcomes Framework 1.18 Social Isolation</u>)

STRATEGIC OUTCOME: Enabling resilient and thriving communities

"I" Statement: "As my needs change I will talk about my feelings, keep active, learn, ask for help and participate in social and community life to maintain good mental health"

OUTCOME	COMMON STANDARD		SCORE		METHOD OF MEASURING IMPACT	
OUTCOME	COMMON STANDARD	1	2	3	METHOD OF MEASURING IMPACT	
Improved access to interventions that promote social activities and strong social networks to improve levels of mental wellbeing in the population	All localities will facilitate / commission a range of interventions that enhance social interaction (capital) such as arts, music, creativity, learning volunteering and timebanks				The proportion of people who use services and carers, who report that they have had as much social contact as they would like (<u>Adult Social Care Outcomes Framework</u>)	

GM Common Standards for Mental Health and Wellbeing have been co-designed by the following Greater Manchester groups using national guidance.

- GM Adult Mental Health Board
- GM Children's Mental Health Board
- GM Mental Health and Wellbeing Group
- GM Suicide Prevention Executive

Outcome measures affected in GM Population Health Outcomes Framework:

(4.02) Proportion of 5 year old children free from dental decay

As poor oral health is almost always preventable, these standards seek to set a level of self and professionally led care to establish good oral health. These standards are derived from well-established, nationally published guidelines with a strong evidence base including Commissioning Better Oral Health (PHE, 2014) and NICE.

The document forms part of the common standards suite of population health measures. It links fits within the population health and prevention Theme 1 of the Greater Manchester Health and Social care plan but also contributes to the themes of enabling better care, transforming care in localities and standardising acute hospital care.

Standards for dental services have been outlined within the GM plan for dentistry "Putting the mouth back in the body, 2017-2021" and complement the oral health standards below:

- Improving access to general dental services
- Improving cancer survival rates and earlier diagnosis
- Ensuring a proactive approach to health improvement and early detection
- Improving outcomes for people with long-term conditions
- Improving outcomes in childhood oral health
- Proactive disease management to improve outcomes

Greater Manchester's strategic priorities are as follows:

- 1. Everyone can eat speak and socialise without the pain or discomfort of dental disease.
- 2. People can access dental care when needed.
- 3. Differences in oral health between individuals and groups across GM are reduced.

This is document provides a list of standards and measures, and a core outcome linked to the GM Population Health Outcomes Framework. Commissioners, providers, and clinicians are asked to review current practice against these standards and identify any gaps in evidence. Actions should be developed to address these gaps with supporting evidence and KPIs developed to feed into the performance framework for Local Care Organisations.

STRATEGIC OUTCOME: Improving the Health of the GM Population and Reducing Health Inequalities across GM

"I" Statement: "I will live a long and healthy life in Greater Manchester"

Cont

Outcome measures affected in GM Population Health Outcomes Framework:

Latest Value New HIV diagnosis rate / 100,000 people aged 15+
Total Prescribed LARC (Long Acting reversible Contraception) excluding Injections rate / 1,000

Poor sexual and reproductive health, including the ongoing transmission of HIV, has major impacts on Greater Manchester residents, and despite the progress made, there are still high rates of HIV and STIs in the conurbation. Continuing challenges include the rising rates of some sexually transmitted infections, the continuing transmission of HIV and continuing inequalities in outcomes. Almost half all HIV diagnoses in GM are late, which lead to poorer outcomes for the individual and increased risk of onward transmission. Further demands on services are anticipated with the potential introduction of pre-exposure prophylaxis (PrEP) and immediate initiation of anti-retroviral therapy (ART).

The vision for Greater Manchester is that:

- all residents have the knowledge, skills and confidence to make informed choices about their sexual health, reproduction and relationships;
- sexual and reproductive health services are accessible, sensitive and appropriate for all;
- improved outcomes in sexual and reproductive health, bringing Greater Manchester to among the best in the country;
- working together to eradicate HIV in a generation

Our ambition is for a holistic system to ensure good sexual and reproductive health for all Greater Manchester residents with clear pathways, common standards and expectations set within it enabling people to access what they need, at a consistently high quality, when and where they need it. This includes guidance for health and care providers to recognise that adults over the age of 50 can remain sexually active and have sexual healthcare needs that may go unrecognised. In addition, we aim to help people be more open about their sexual and reproductive health and reduce the stigma associated with poor sexual health outcomes. These reforms of the system aim to have the following impacts on the region:

- GM population will be able to exercise personal choice and self-management regarding sexuality, sexual health and contraception.
- Significantly reduced prevalence of STIs & HIV in GM, particularly amongst targeted, higher risk communities.
- Ensure that we are prepared for emerging challenges in sexual health including multidrug resistant gonorrhoea.
- Improved health and life expectancy for people living with HIV within GM, thus improving the quality of life for people living with HIV and reducing the cost to the subregion's health and social care system.
- Maintain open access to sexual and reproductive health services, giving people the choice of where to attend.
- Agreed standards across the system to ensure that no matter where people gain access to the system, they are able to obtain the right, high quality care.
- Deliver a more consistent primary care offer, especially for reproductive health.

4. Greater Manchester Common Standards for Sexual and Reproductive Health

STRATEGIC OUTCOME: Improving the Health of the GM Population and Reducing Health Inequalities across GM

"I" Statement: "I will live a long and healthy life in Greater Manchester "

OUTCOME	COMMON STANDARD	1	2	3	METHOD OF MEASURING IMPACT
Sexual & Reproductive Health is embedded within Health & Social Care	Sexual & Reproductive Health is a strategic consideration within overarching plans for health and social care transformation and is embedded within service provision.				Presence of Sexual & Reproductive Health in plans for Health and Social Care transformation.

STRATEGIC OUTCOME: Start Well - Give every GM child the best start in life

"I" Statement: "I will make sure that every GM child will has the best start in life and will develop well "

OUTCOME	COMMON STANDARD	SCORE			METHOD OF MEASURING IMPACT
OUTCOME	COMMON STANDARD	1	2	3	METHOD OF MEASURING IMPACT
Maintain the uptake of syphilis, HIV and Hepatitis B testing in pregnancy	All pregnant women are screened for infectious diseases in line with NHS screening guidelines				% of uptake

Greater Manchester Common Standards for Sexual and Reproductive Health

STRATEGIC OUTCOME: Live Well - Ensure every GM resident is enabled to fulfil their potential

"I" Statement: "I will maintain good health and wellbeing and will have good and equitable access to information, support and services"

"I" Statement: "I will have swift access to the service(s) I need"

"I" Statement: "I will be offered choice and support to make an informed decision regarding contraception"

"I" Statement: "I will have access to the testing and treatment I need"

"I" Statement: "I will be given information and advice about reducing my personal risk of sexual health issues "

OUTCOME	COMMON STANDARD		SCORE		METHOD OF MEASURING IMPACT		
OUTCOME	COMMON STANDARD	1 2 3		3	WETHOD OF WEASORING IMPACT		
Positive patient experience Patient supported following an HIV	Inclusion of questions around sexual &				Delfant		
diagnosis	reproductive health in all annual patient surveys (surveys, focus groups)				Patient survey		
Delivering a responsive service							
48 hour access to STI treatment and advice for symptomatic patients	100% offer within 48 hours				Clinic data		
Improve cervical cancer screening uptake	80% of women uptake cervical screening				NHS England uptake data		

STRATEGIC OUTCOME: Live Well - Ensure every GM resident is enabled to fulfil their potential (continued)

OUTCOME	COMMON STANDARD		SCORE		METHOD OF MEASURING
OUTCOME	COMMINION STANDARD		2	3	IMPACT
	All under 18s within a locality are encouraged to visit a sexual & reproductive health service or GP before engaging in sexual activity and are having appropriate levels of contact with these services during adolescence				Rate per 1,000 (15-17 year olds)
Reduction in	All schools to provide an up-to-date and appropriate age-related RSE programme				tbc
unwanted pregnancies	Open access to specialised services for young people up to the age of 19				No. of clinic sessions available per week with staff trained to work with young people across Greater Manchester
	All young people to have access to school based drop-in sessions				School nurse drop-in sessions available in every secondary school
Increase in uptake of long acting reversible	All women (15-44 years old) are fully informed about and, if clinically appropriate, encouraged to use LARC as their form of contraception				Rate per 1,000 (15-44 year olds)
contraception (LARC)	For all women having a LARC removed and requiring contraception to have immediate access to an alternative, reliable method of contraception				Audit (tbc)
Reduction in new and	Routine offer of an HIV test in high prevalence areas and a regular, targeted offer to those in high risk groups				Number of new diagnoses and % of which are late
late diagnosis of HIV	Evidence of training re Blood Borne Viruses for Primary Care every 3 years				Training to GPs/Pharmacies for advice and onward referral

STRATEGIC OUTCOME: Live Well - Ensure every GM resident is enabled to fulfil their potential (continued)

OUTCOME	COMMON STANDARD	SCORE			METHOD OF MEASURING IMPACT	
		1	2	3	IMI ACT	
Improve Chlamydia detection rate	Achieve the agreed population level Chlamydia detection rate and meet PN standards				Rate per 100,000 (15-24 year olds) and maintain PN rate of 0.6	
Reduction in the prevalence of STIs and onward transmission	Improved digital offer including self-assessment of risk, campaigns				Number of new diagnoses and rate per 100,000 residents	

STRATEGIC OUTCOME: Age Well – Every adult will be enabled to remain at home, safe and independent for as long as possible

"I" Statement: "I will maintain good health and wellbeing and will have good and equitable access to information, support and services"

"I" Statement: "I will have swift access to the service(s) I need"

"I" Statement: "I will be offered choice and support to make an informed decision regarding contraception"

"I" Statement: "I will have access to the testing and treatment I need"

"I" Statement: "I will be given information and advice about reducing my personal risk of sexual health issues "

OUTCOME	COMMON STANDARD	SCORE			METHOD OF MEASURING
		1	2	3	IMPACT
Reduction in prevalence of STIs and reduction in new and late diagnosis of HIV	Older people will have their diverse/various sexual health and wellbeing needs recognised in the delivery of health service in primary and secondary care and in specialist sexual health services				To be defined
Reduce physical, psychological, social, cultural and relationship issues that relate to sexual activities of older people	Health and care staff across all sectors to have evidence-based education about the sexual health needs and difficulties that older adults may encounter. The programs of education should take account of the physical, psychological, social, cultural and relationship issues that impact on sexual activities and intimacy.				To be defined

STRATEGIC OUTCOME: Enabling resilient and thriving communities and neighbourhoods

"I" statement: "I will live, work and play in a strong and thriving community and neighbourhood"

OUTCOME	COMMON STANDARD		SCORE		METHOD OF MEASURING
COTOCINE	COMMON CTANDARD	1	2	3	IMPACT
Reduction in abortions and repeat abortions	LARC offered post-abortion				Rate per 1,000 (15-44 year old women) and % of who are under 25
Reduction in repeat STIs	Provision of personalise risk reduction support and information				% re-infected within 12 months

GM Common Standards for Sexual and Reproductive Health have been co-designed by the following Greater Manchester groups using national guidance.

- GM Sexual Health Strategic Partnership Board
- GM Sexual Health Commissioners Group
- GM H&SCP Common Standards Network Group

5. Greater Manchester Common Standards – Drug and Alcohol service standards

Outcome measures affected in GM Population Health Outcomes Framework:

(10.01) Admission episodes for alcohol-related conditions (narrow definition)

Drug and Alcohol Common Standards have been developed by GM substance misuse commissioners for the services they commission. As such they are 'service standards'. There is not direct reference to important wider system elements such as hospital-based Alcohol Liaison Nurses as typically these are not directly commissioned by local authorities. However, the need for clear pathways between hospital and community-based services to prioritise improving outcomes for people with co-existing drug, alcohol and mental health problems is clearly addressed. Similarly, brief interventions that would be delivered by partner agencies are not directly considered but the need for drug and alcohol services to link with Public Service Hubs, Place Based Teams and targeted services is. GM substance misuse commissioners fully appreciate that the next stage in the process of developing these service standards is to work with providers to ensure implementation.

The vision is to make Greater Manchester a place where everyone can have the best start in life, live well and age well, safe from the harms caused by drugs and alcohol:

- A place where children, young people and families have the best start in life and future generations grow up protected from the impact of drug and alcohol misuse.
- A place where people who drink alcohol choose to do so responsibly and safely.
- A place where people are empowered to avoid using drugs and alcohol to cope with adversity and the stresses and strains of life.
- A place where our services and communities work together to build resilience and address the harms caused by drugs and alcohol.
- A place where individuals who develop drug and alcohol problems can recover and live fulfilling lives in strong resilient communities.

We will achieve the vision by:

- Recognising that substance use is diverse and complex, and collectively responding to changing patterns of substance use and behaviour to provide the most effective route
 to recovery from all types of substance misuse.
- Rooting our approach in prevention and early intervention, anticipating future cost and escalating demand on services, and ensuring responses are appropriate to levels of need and health risk.
- Basing our approach to treatment and harm reduction on a growing evidence base, and a shared understanding of challenges, opportunities and changing circumstances ensuring that we share learning, expertise and resources.
- Using asset-based approaches to enable long-term and sustained recovery from all types of substance misuse.
- Adopting a whole-person approach to working with complex families and individuals and integrating provision with wider delivery models tackling Complex Dependency.

5. Greater Manchester Common Standards for Drug and Alcohol service standards

Strategic Priority: Prevention and Early Intervention

STRATEGIC OUTCOME: Start Well - Give every GM child the best start in life

"I" Statement: "I will live in a place where children, young people and families have the best start in life and future generations grow up protected from the impact of drug and alcohol misuse."

OUTCOME	COMMON STANDARD		SCORE	.	METHOD OF MEASURING IMPACT
OUTCOME	COMMON STANDARD	1	1 2 3		METHOD OF MEASURING IMPACT
Reduce alcohol exposed pregnancies and eliminate new	Services will provide specific pathways for pregnant women that support them to remain alcohol free during pregnancy				Reduction in the number of alcohol exposed pregnancies
cases of Foetal Alcohol Spectrum Disorder (FASD).	Services will provide additional focus for women with significant and complex needs who are at high risk of using alcohol whilst pregnant				
A targeted approach to young	Services will provide targeted early interventions for high risk young people				Number of high risk young people engaged (NDTMS risk profile data)
people, adults and families most at risk of harm from drugs and alcohol	Services will provide support for high risk families				Availability and uptake of family support: Number of families supported per local area (Local Audit and Data)

Strategic Priority: Reducing drug and alcohol related harm

STRATEGIC OUTCOME: Live Well - Ensure every GM resident is enabled to fulfil their potential

"I" Statement: "I will live in a place where people are empowered to avoid using drugs and alcohol to cope with adversity and the stresses and strains of life."

OUTCOME	CONTINUE TO A DE	SCORE			METHOD OF MEACHDING IMPACT
OUTCOME	COMMON STANDARD	1	2	3	METHOD OF MEASURING IMPACT
	Services will be linked to Public Service Hubs, Place Based Teams and targeted services.				
A place based approach that prioritises early help	Services will work closely with primary care and other health and social care agencies established to help meet the complex and overlapping needs of children, young people, adults and their families, including pathways for pregnant women.				Clear evidence of service pathways and processes in place to identify and address the needs of those most at risk. (PSR Local Audit & Self-Assessment Tool)
Reduce the number of deaths caused by drugs and alcohol	Services will offer access to relapse prevention after exit				Reduction in number of drug related deaths and alcohol mortality rates (PHE data)
	Services will guarantee that those who need to re-enter treatment are able to do so				
Develop a GM approach to understanding and reducing drug and alcohol related deaths.	Naloxone will be available for all opiate users regardless of treatment status across GM				Local audit approach to be developed as part of GM approach

OUTOOME	20111011 274117477	SCORE			
OUTCOME	COMMON STANDARD	1	2	3	METHOD OF MEASUREING OUTCOME
Address the impact of drug and alcohol on our most vulnerable people	Services will deliver targeted interventions for those with the most complex needs and work with PSR hubs to do so				Clear evidence of joint working and integration with PSR hubs (Local Audit. PSR team self-assessment tool) (Local Audit)
	Service care plans should identify the full range of an individual's complexities to facilitate joint working and support from other agencies				Clear evidence of care plans identifying need
	Services will offer women only provision, including group support				Clear evidence of provision and uptake. (Local Audit including service user feedback)
	Services will align and integrate working with women's centres and other organisations that work with vulnerable women				Clear evidence of joint working. (Local Audit including service user feedback)
	Services will have agreed transitional pathways between all young people's and adult services				Clear evidence of pathways. (Local Audit)
	Services will be part of a multi-agency response to safeguarding				Clear evidence of engagement in safeguarding processes. (Local Audit)
	Services will target complex families in partnership with other agencies				Clear evidence of engagement with complex families. (Local Audit)

Strategic Priority: Reducing drug and alcohol related harm Strategic Outcome: Live Well - Ensure every GM resident is enabled to fulfil their potential

"I" Statement:"I will live in a place where people are empowered to avoid using drugs and alcohol to cope with adversity and the stresses and strains of life."

OUTCOME	COMMON STANDARD	SCORE			METHOD OF MEASURING IMPACT	
OUTCOME	COMMON STANDARD	1	2	3	WIETHOD OF MEASURING IMPACT	
Prioritise improving outcomes for people with co-existing drug, alcohol and mental health problems	There will be reciprocal arrangements for joint support between substance misuse and mental health services.				Protocols between mental health and substance misuse for supporting adults and young people with coexisting mental health and substance misuse issues. (Local Audit)	
	There will be clear pathways between hospital and community based services inclusive of recovery support.				Clear evidence and uptake of pathways. (Local Audit)	
	Community based services will facilitate access to inpatient, detox and residential rehab provision.				Uptake and successful completion of provision (NDTMS data) Provision will meet CQC requirements. (Local Audit)	
	An individual's mental health will be assessed appropriately before discharge from inpatient, detox and residential rehab services.				Requirement through GM Tier 4 framework.	
Focus on blood bourne viruses to	Services will screen and test for BVBs, offer vaccinations, and support clients to start and complete treatment (e.g. for Hep C)				Uptake of screening, testing, vaccination and support. (NDTMS data)	
help achieve the strategic aims of eliminating HIV and Hepatitis C as public health issues	Needle Exchange facilities will be available and accessible throughout GM.				Mapping of provision and monitoring of needle exchange data (Local Audit)	
	Services will meet the specific needs of image and performance enhancing drug users.				Monitoring of needle exchange data and engagement. (Local Audit)	

Strategic Priority: Reducing drug and alcohol related harm

Strategic Outcome: Live Well - Ensure every GM resident is enabled to fulfil their potential

"I" Statement: "I will live in a place where people are empowered to avoid using drugs and alcohol to cope with adversity and the stresses and strains of life."

	COMMON STANDARD		SCORE	E	METHOD OF MEASURING IMPACT
OUTCOME		1	2	3	
Improve the physical health of adults with drug and alcohol problems through screening, early identification and onward referral	Services will conduct routine and ongoing physical assessments for those in treatment.				Monitoring of screenings and referrals (Local Audit / NDTMS data)
	There will be will be clear referral pathways linking treatment services with primary care and the wider health system				
Reduce drug and alcohol related fires	Services will make referrals to the Greater Manchester Fire and Rescue Service for 'Safe and Well' home assessment visits				Monitoring of referrals and home visits (Local Audit /GMFRS data)
Improve recovery outcomes through a	Services will ensure the effective stratification of treatment populations in line with national guidance so that pharmacological and psychological interventions are appropriately targeted.				Monitoring of recovery outcomes (Local Audit / NDTMS data)
detailed understanding of the different needs of our treatment populations	Services should deliver asset based continuous assessment				Local audit

0.1700117	COMMON STANDARD	;	SCORE		
OUTCOME		1	2	3	METHOD OF MEASURING IMPACT
	Treatment systems will evidence clear pathways to and from key support services				Local Audit + NDTMS data
Clearly link treatment systems to key support services (e.g. mental health, housing and homelessness, employment, education and training)	At a neighbourhood level, we are focusing on helping people to help themselves through developing integrated place based services that are responsive to local need, build on the assets of the community and create capacity to deliver change. These integrated teams will work to improve individual and community resilience by understanding individual needs in the context of the family and their community.				Local Audit
	Ensure that residential rehab and detox have pathways and links back into community and recovery services with appropriate information sharing				Local Audit + NDTMS data
Promote wellbeing and recovery by clearly	Services will promote approaches that focus on people's assets, reduce stigma and encourages people to help themselves and others in recovery communities				Local Audit + NDTMS data
linking treatment systems with voluntary and community based organisations	Services will maximise the role played by local people and the VCSE in supporting long term sustained recovery				Local Audit + NDTMS data
Services will connect with communities of identity and ensure that barriers to seeking advice and engaging in treatment are removed	Communities of identity will be engaged in the co-production and co-design of services				Local Audit

OUTCOME	COMMON STANDARD	,	SCORE		METHOD OF MEASURING IMPACT
		1	2	3	
Ensure recovery is visible in our communities and throughout treatment	Services will ensure that those in successful recovery are clearly visible to their peers as examples of hope and what is achievable.				Local Audit
journeys	Services will conduct treatment exit plans which assess recovery support required				Local Audit + NDTMS data
Involve those with lived experience in the design and delivery of person and community centred approaches	To support rehabilitation and build recovery in our communities, we involve service users and people with lived experience in the design and delivery of drug and alcohol services.				Local Audit

Strategic Priority: Reducing drug and alcohol related crime and disorder

STRATEGIC OUTCOME: Enabling resilient and thriving communities and neighbourhoods

"I" Statement: "I will live in a place where our services and communities work together to build resilience and address the harms caused by drugs and alcohol."

OUTCOME	COMMON STANDARD		SCORE		METHOD OF MEACHDING IMPACT
OUTCOME	COMMON STANDARD	1	2	3	METHOD OF MEASURING IMPACT
The development of a set of common offers that clearly identify "what works" in reducing drug and alcohol related offending	Services will participate in the development and endorsement of common GM offers across police custody, courts, community orders and <i>Through The Gate</i> to create consistent GM approaches				Clear evidence of GM agreement and application (including interaction between services)
Maximise every opportunity to address	Ensure criminal justice and treatment agencies work closely together to improve the effectiveness of out of court disposals and community sentences, such as drug, alcohol and mental health treatment requirements.				Increase in the number of Out of Court Disposals and Community Sentence Treatment Requirements. Reduction in repeat appearances. Court data + data from NPS/CRC
offending behaviour that is driven by the use of drugs and alcohol	Work closely with prisons in the resettlement of offenders to improve continuity of care				Reduction in the number of people returning into prison custody. Court data + data from NPS/CRC
	Ensure suitable post prison offer for people who have become abstinent in prison				Audit of availability and monitor provision
Work with criminal justice partners to ensure that responses to young people's drug and alcohol related offending are appropriate to their needs.	Ensure local agencies review how to take every opportunity to identify young people at an early stage and work together to put in place appropriate support.				Reduction in young people's reoffending
Focus on targeted geographical problem- solving approaches which involve our communities.	Work with Community Safety and local partners to develop local strategies which address open use of drugs and drug and alcohol related anti-social behaviour.				Improved public confidence

6. Greater Manchester Common Standards – Physical Activity

Outcome measures affected in GM Population Health Outcomes Framework:

- % of children aged 5-15 meeting national physical activity guidelines (At least 60 minutes (1 hour) of moderate to vigorous intensity physical activity (MVPA) on all seven days in the last week)
- % of GM children aged 2-15 who are active or fairly active
- % of GM population who are Active or Fairly Active
- % of physically inactive adults (current method)
- % physically active for at least one hour per day seven days a week

The ambition is everyone in Greater Manchester to be more active to secure the fastest and greatest improvement to the health, wealth and wellbeing of the 2.8m people of Greater Manchester.

Greater Manchester (GM) Moving: The Plan for Physical Activity and Sport (2017-21), is the comprehensive framework to reduce inactivity and increase participation in physical activity and sport that is aligned to the Greater Manchester Population Health Plan priority themes and wider reform agenda. Its shared purpose is to positively change the lives of people across Greater Manchester through physical activity and sport. Building from our strengths and through system wide collaboration, we will double the rate of past improvements, reaching the target of 75% of people active or fairly active by 2025.

The 12 key priorities/drivers to achieve the above are:

- 1. Lead policy, legislation and system change to support active lives, ensuring that physical activity becomes a central feature in policy and practice related to planning, transport, health and social care, economic development, education and the environment.
- 2. Provide strategic leadership to secure system change for physical activity and sport across the life course, with person centred, preventative approaches in an integrated system.
- 3. Ensure that children aged 0-4 have the best active start in life with physical literacy prioritised as a central feature of starting well.
- 4. Make Greater Manchester the best place in England for children, young people and young adults aged 5-25 to grow up, developing their life chances through a more active lifestyle, with a focus on reducing inequalities.
- 5. Increase physical activity and sport across the adult population, reducing inequalities and contributing to health, wealth and wellbeing.
- 6. Make active ageing a central pillar within the Greater Manchester Ageing Hub supporting the Greater Manchester ambition for an age friendly city region, which will lead to better health, wellbeing and independence.
- 7. Develop more active and sustainable environments and communities through active design and infrastructure.
- 8. Maximise the contribution of the physical activity and sport sector to economic growth across Greater Manchester.
- 9. Build the knowledge, skills and understanding of the workforce across Greater Manchester to embed physical activity, make every contact count and develop a diverse workforce fit to deliver the ambitions of Greater Manchester Moving.
- 10. Ensure that evidence, data and insight inform the development of policy and practice to support active lives.
- 11. Embed high quality evaluation into all Greater Manchester Moving work, developing quality standards, helping to understand impact, learn and improve, and support advocacy.
- 12. Deliver high quality marketing and communications to support messaging and engagement of people from priority audiences in active lives.

6. Greater Manchester Common Standards – Physical Activity

STRATEGIC OUTCOME: Improving the Health of the GM Population and Reducing Health Inequalities across GM "I" Statement: "I will live a long and active life in Greater Manchester no matter my gender, social class, ethnicity or ability"

OUTCOME	COMMON STANDARD		SCORE	.	Presence of Physical Activity plans within the named fields of planning, transport, health and social care, economic development, education,
		1	2	3	
	Physical Activity is a central feature (re-engineered) in policy and practice related to planning, transport, health and social care, economic development, education, and the environment.				fields of planning, transport, health and social care,
Increase participation in physical activity within the underrepresented groups.	Each area in GM will adopt a Making Every Contact Count approach: all frontline staff are able to talk about the risks associated with being inactive.				% of GM meeting 30-149 and 150 minutes per week of moderate level physical activity broken down by underrepresented groups: (Gender / Social class / Ethnicity / Disability)
	All commissioners and providers focus on reducing inactivity where significant inequalities exist.				

STRATEGIC OUTCOME: Start Well - Give every GM child the best start in life

"I" Statement: "I will ensure that every GM child will have the best active start in life and will develop their life chances through a more active lifestyle"

All planning, design and layout of urban and rural places and spaces across	Every Local Plan, Planning decision, residential and commercial development will meet GM Active Design standards				KPI's from GM Spatial Framework
	Every infrastructure development will meet the standards for walking and cycling/active travel identified in 'Made to Move'.				
GM will inspire, encourage and support active lives	Community, leisure and activity spaces will be high quality, with a broad offer to appeal to a wide range of needs and demands, meeting required standards of to encourage engagement and reduce inequalities.				Implementation of the boroughs playing pitch and indoor facility strategies

6. Greater Manchester Common Standards – Physical Activity

GM Common Standards for Physical Activity have been co-designed by the following GM groups using NICE Guidance; National Strategy; GM Strategy:

- GM Physical Activity Commissioners Group (represented by all ten localities)
- GM Sports Managers Network (represented by all ten localities)
 GM Active (represented by all thirteen Leisure Trusts)
- GM Active Aging
- Director of Public Health Oldham
- Planning & Health Group
- GM Walking and Cycling Commissioner
- GM Early Years

7. Greater Manchester Common Standards – Health Protection

Outcome measures affected in GM Population Health Outcomes Framework:

MMR vaccination rate

Health protection seeks to prevent or reduce the health impact from infectious diseases and environmental hazards such as chemicals and radiation. This is achieved through altering the environment to reduce spread or exposure; the design and provision of health services to prevent, detect and treat infectious diseases; surveillance of health effects and effective response to incidents and outbreaks. Health protection therefore covers follow up of individual cases; outbreak management; surveillance; emergency planning, resilience and response; infection prevention and control; environmental public health; and immunisation.

There is an opportunity to set and raise common standards through taking a GM system wide view of arrangements to identify and share best practice as well as opportunities for more efficient and effective ways of working. These are a set of core common standards for health protection, infection prevention control and EPRR for the developing ICOs / LCOs to create a culture of continuous improvement.

We will work with the LCO Network to ensure common standards are embedded within evolving accountable care systems for reducing long term risk, business as usual and for responding to emergencies within our localities. We want our communities to be empowered and enabled to take action individually or collectively to manage risks and prepare for the consequences of emergencies. In addition to the activity undertaken by the wider public health workforce, there are many individuals and volunteers in our communities that represent a huge resource for peer group health advice, support and community liaison.

Health protection issues and indicators are included in other common standards including sexual health and drugs and alcohol services. These are not duplicated by inclusion here. These standards do not include screenings or civil contingency arrangements outside public health.

STRATEGIC OUTCOME: Improving the Health of the GM Population and Reducing Health Inequalities across GM "I" Statement: "I will live a long and healthy life in Greater Manchester"

011700145	COMMON STANDARD 1		SCORI	E	METHOD OF MEASURING
OUTCOME			2	3	IMPACT
	A written protocol / plan is in place for the management and governance of local outbreaks and incidents				
	Roles and responsibilities of all organisations in outbreaks and public health incidents are clearly defined, agreed and documented				
	Incident Management Team structure and responsibilities are defined				
	Responsibilities for commissioning and paying for interventions in outbreaks and public health incidents are agreed and documented				
Minimise the harm caused by outbreaks and incidents	Process for capturing and embedding learning from outbreaks and public health incidents is in place				Sector Led Improvement review / PHE national stocktake
and moderns	Activation and escalation processes are documented for outbreaks and public health incidents				
	Arrangements are in place to collect samples (swabbing, blood and stool samples etc) if required in outbreaks and public health incidents				
	Arrangements are in place for environmental monitoring and sampling (food, water, premises etc) in outbreaks and public health incidents				
	Arrangements are in place for the delivery of clinical interventions (antivirals, antibiotics, vaccines) in outbreaks and public health incidents

OUTOOME			SCORE		METHOD OF MEASURING
OUTCOME	COMMON STANDARD	1	2	3	IMPACT
People in GM live and work in areas with good air quality	Health is included as key consideration in local plans to reduce exposure to air pollution in line with NICE Guideline NG70				Modelled estimates of population-weighted annual average PM _{2.5} concentrations

7. Greater Manchester Common Standards – Health Protection

GM Common Standards for Health Protection have been co-designed by the following GM groups using NICE Guidance; National Strategy; Greater Manchester Strategy:

- GM Health Protection Confederation
- GM Infection Prevention Control Collaborative
- GM Civil Contingencies Resilience Unit
- GM HSCP Screening and Immunisation Team

In addition to the above GM groups the GM Common Standards were reviewed at a GM Workshop on 16th March 2018 which included representation from a range of groups: LA Public Health, GM Local Care Organisation Network, GM Public Protection Group, Environmental Health, Civil Contingencies Resilience Unit, GMHSCP Screening and Imms Team, GMCA, Emergency Planning and Acute Providers.

8. Greater Manchester Common Standards – Tobacco Control

Outcome measures affected in GM Population Health Outcomes Framework:

- Smoking prevalence in adults current smokers (APS)
- Smoking prevalence in adults in routine and manual occupations current smokers

2017 saw the launch of the government's new tobacco control strategy for England, Towards a Smokefree Generation which articulates our desire to reduce adult smoking prevalence levels to 5% or less by 2030. Challenging interim targets are set. Smoking is still by far the biggest single cause of early death and ill health in Greater Manchester, with huge economic an environmental impact. Although our starting point, in terms of achieving the government's targets, is much more challenging than in more affluent areas, we are no less ambitious or aspirational. We have developed a model, called GM Power, which will allow us to tackle all of the causes of smoking and tobacco related harm. This model is based on the World Health Organisation Tobacco Control Framework.

Smoking rates have reduced across Greater Manchester in recent years, but we now need to make change at scale and pace if we are to meet national and GM targets. We must ensure that good practice is applied consistently in all areas of GM whilst at the same time testing new and innovative programmes, particularly in NHS settings, such as secondary care. By applying GM Power across the conurbation in evidence based, but ambitious ways, we aim to cut smoking rates across Greater Manchester by one third by 2021.

The common standards for tobacco control are challenging and will require a commitment to carry on what works and improve or change what does not. We will have to communicate well and make compelling cases for implementation of our standards if their importance is not recognised or understood. We will need to convince all of our partners across local authorities, CCGs, Acute Trusts, Primary Care, the voluntary and community sector, the Fire and Rescue Service, Enforcement Agencies, academia and residents, that tobacco control is right and is everyone's business; that smoking is not just about personal choice, but about protecting everyone across all ages from the very many ways that tobacco can damage our GM residents' lives.

STRATEGIC OUTCOME: Improving the Health of the GM Population and Reducing Health Inequalities across GM "I" Statement: "I will be increasingly unlikely to be affected by tobacco related health disease as a GM resident"

OUTCOME	OME COMMON STANDARD		SCORE		METHOD OF MEASURING IMPACT
OUTCOME			2	3	
Whole system Tobacco Control is embedded in Health and Social Care and the Environment	The GM Power model for Tobacco Control will be translated into local plans for each area of GM.				Each area of GM will have a Tobacco Control Plan based on GM Power.

STRATEGIC OUTCOME: Start Well - Give every GM child the best start in life

"I" Statement: "I will ensure that babies, children and young people are protected from the harm caused by tobacco from conception through to adulthood"

OUTCOME	COMMON STANDARD		SCORE		
00000000			2	3	METHOD OF MEASURING IMPACT
Children are protected from tobacco related	All pregnant women will have a Carbon Monoxide breath test				% of pregnant women who have a Carbon Monoxide Breath test (GM Maternity Dashboard)
harm from conception onwards	All pregnant women who smoke are referred to services which can help them to stop smoking during their pregnancy				Smoking at time of delivery rates (SATOD) reduce (N.B. target 6% by 2021 for GM).
Children and young people will be protected from Environmental Tobacco Smoke	All families are supported to achieve a smoke free home				Smoke free outdoor spaces for children Smoke free homes programme in place

STRATEGIC OUTCOME: Live Well - Ensure every GM resident is enabled to fulfil their potential

"I" Statement: "All smokers in GM are given the help they need to quit"

	COMMON STANDARD		COR	E	
OUTCOME			1 2 3		METHOD OF MEASURING IMPACT
All smokers in GM understand the risks of smoking and tobacco related harm and tobacco addiction	Each area in GM will adopt a Making Every Contact Count approach: all health and social care staff are able to talk about tobacco addiction and the risks associated with smoking. (NB. suggest front line NHS staff, Housing Officers, Social Care Professionals).				Numbers of staff trained per year to understand tobacco addiction (type of training to be determined locally)
					Numbers of health and social care staff trained
All smokers should be able to access all available frontline pharmacotherapies. Combination Nicotine Replacement Therapies should always be an option. Any pharmacotherapy supplied should be alongside motivational support	Publicised arrangements are in place for smokers to access				Evidence of communication and advice on pharmacotherapy and nicotine inhaling products that do not contain tobacco
	pharmacotherapy and motivational support in all areas (Including advice about nicotine inhaling products that do not contain tobacco).				Local plan for the provision of pharmacotherapy to support people to quit
					% of smokers helped to quit through local tobacco addiction services.
Tobacco Control measures (including tobacco addiction support) will focus on groups known to have higher smoking prevalence rates in order to reduce smoking related health inequalities	All areas will have plans to focus resource on the areas and groups with the highest prevalence of smoking (routine and				Routine and manual smoking rates and uptake of services
	manual occupation; mental health problems; LGBT community; groups with complex long-term conditions caused or exacerbated by smoking; locally identified priority groups; offenders).				Adult smoking prevalence rates
				_	Evidence of quit support for people in the areas and groups with the highest prevalence of smoking
All smokers admitted to hospital will be assessed and treated for nicotine addiction irrespective of the cause of admission. (There will be zero tolerance to smoking for staff, patients and visitors).	All smokers admitted to hospital will receive appropriate pharmacotherapy and motivational support as inpatients and on- going support on discharge. All inpatients and outpatients receive appropriate advice and support to quit.				An appropriate service model such as the "CURE" programme is in place across secondary care settings

STRATEGIC OUTCOME: Live Well - Ensure every GM resident is enabled to fulfil their potential (continued)

"I" Statement: "All smokers in GM are given the help they need to quit"

OUTCOME	COMMON STANDARD	SCORE			
		1	2	3	METHOD OF MEASURING IMPACT
All smokers in GM, who receive a Safe and Well visit from Greater Manchester Fire and Rescue Service (GMFRS), understand how to access support to quit or to have a smoke-free home	GMFRS will provide smokers with Very Brief Advice and offer a referral or signpost to Stop Smoking Services (or other support) during Safe and Well visits.				Number of GMFRS staff Trained per year (GMFRS electronic training input 'Smoking Related Fires and Tobacco Control – includes VBA)
					Referral rates from GMFRS to partners Delivery of Very Brief Advice (recorded on Safe and Well visit records)

STRATEGIC OUTCOME: Age Well - Every adult will be enabled to remain at home, safe and independent for as long as possible "I" Statement: "I will be supported to give up smoking to improve my quality of life and smoking related disease at any age."

OUTCOME	COMMON STANDARD	SCORE			
30.7332			2	3	METHOD OF MEASURING IMPACT
Tobacco Legislation is enforced, and	Publicised arrangements are in place for members of the public to report concerns about illicit tobacco and breaches of legislation e.g. underage				Numbers of reports to local Trading Standards teams
illicit tobacco is countered.	sales.			_	Numbers of intelligence lead inspections and test purchases
	All areas will work with GMFRS to ensure that smokers have access to fire safety advice and literature and are routinely offered a referral or signpost to GMFRS for a Safe and Well visit				Numbers of staff trained per year by GMFRS
All smokers in GM understand the fire risk associated with smoking and have access to fire safety advice and interventions to reduce their risk of fire.					Referral rates to GMFRS from partners
					Number of Safe and Well visits delivered to smokers
					Numbers of smoking-related accidental dwelling fires, injuries and deaths recorded by GMFRS
Smoke free hospitals: there is zero tolerance to smoking for staff, patients and visitors in all hospitals across GM	All acute and mental health trusts to develop and implement a Smokefree policy				NICE guidance PH48 implemented in full
There will be more smoke free public spaces in GM	All areas will increase the number of voluntary schemes promoting smoke free family spaces				Numbers of new voluntary smoke free family spaces per GM area
A smoke free Public Sector	All public organisations' sites and grounds are supported to be smoke free				% compliance rates

GM Common Standards for Health Protection have been co-designed by Tobacco Control Leads for each of the 10 GM localities using NICE Guidance; National Strategy; GM Strategy:

- GM Fire and Rescue Service
- GM Health and Social Care Partnership (Tobacco Programme)
- Age Friendly Manchester and Greater Manchester
- CURE Programme Lead Christie Hospital Cancer Research UK
