

BURY

Provision & Access to NHS Dentistry

July 2022

Prepared by: Lindsey Bowes, Senior Primary Care Manager (Dental)
Emma Hall-Scullin, Consultant in Dental Public Health
Ashley Seasman, Business Manager (Dental)
Lindsey LaVantae (Business Manager (Dental))

INTRODUCTION

1. This paper provides an update on the provision of, and access to, NHS Primary, Secondary, and Community Dental services and delivery of Oral Health Improvement activity across the locality of Bury from March 2020.
2. It will highlight the actions taken to address health inequalities and to improve access to dental services to ensure patients are able to receive dental care and oral health improvement in a safe way.

DENTISTRY ACROSS THE LOCALITY OF BURY

Primary Care Dental Service

Patients are not registered with a GDP in the same way as they are with a GP. Any patient may access dental services from any practice. In Bury there are:

- 31 (8.1%) General Dental Services providers with contracted activity of 287,812 units of dental activity per annum
- 1 Urgent Dental Care provider (linked to networked provision across Greater Manchester)
- 1 Urgent Dental Care Hubs – providing additional urgent dental care capacity in response to COVID pressures

Specialist Dental Services in the community

- Community Dental Services clinics delivered by Bridgewater Community Healthcare NHS FT - A single service provider commissioned to provide specialist dental services to children and adults with additional needs on referral.
- 2 Orthodontic providers
- 1 Specialist Tier 2 Oral Surgery provider (10 across GM)

Secondary Care Dental Services

12 dental specialities (including Oral Surgery, Maxillofacial Surgery, Restorative Dentistry, Paediatric Dentistry, Periodontics) available through hospital services. These services for Bury are delivered by Northern Care Alliance and Manchester Foundation Trust (including the Manchester Dental Hospital).

BACKGROUND (1)

1. Dental services have been significantly impacted by the COVID pandemic. Risk of cross-infection is significantly increased for services operating in and around the mouth.
2. On 25 March 2020, dental practices across the Greater Manchester received national instruction to suspend routine, non-urgent dental care as part of the national response to limit transmission of COVID-19.
3. All practices were required to provide remote telephone triage services delivering the “triple A” approach, ensuring that patients had access to advice, analgesia and anti-microbials if appropriate. Where patients needed face to face dental treatment in addition to the “triple A” service, dental practices could refer their patients to Urgent Dental Care (UDC) hubs across GM.
4. From 8th June 2020, the second phase of the pandemic response began, as infection rates dropped, all practices reopened for provision of both routine and urgent dentistry under COVID-specific infection prevention and control guidance to ensure patient safety and access steadily increased. It should be noted that during this period due to infection prevention and control guidance and required time intervals between patients, the number of patients seen on a daily basis reduced from 25-30 patients per day to 6-8 patients per day (depending on patient and need).

BACKGROUND (2)

5. The reduction in capacity resulted insignificant pressures across the system. There was a whole system reduction of approximately 70% across all Dental Services capacity, including Secondary Care, specialist community services and specialist primary dental care services such as Minor Oral Surgery.
6. Services are now working hard on recovery to pre-pandemic levels. Reducing backlogs and waiting lists.

PLANNING AND RECOVERY

The Greater Manchester Dental Commissioning Team, including the Consultant in Dental Public Health and the Local Dental Network Chair, are implementing a Roadmap to Recovery.

This plan outlines the stages leading to recovery for dental services across the whole system. The purpose being to standardise the approach across Greater Manchester, to strategically plan a range of dental services, and to support opportunities for locally responsive transformational change thus reducing health inequalities.

The purpose of the plan:

- Ensure capacity is in place for on-going activity
- Return critical services to agreed standards
- Address backlog of services
- Retain changes and innovations from the pandemic that we wish to keep

IMPROVING ACCESS TO NHS DENTAL SERVICES

IMPROVING ACCESS – GM URGENT DENTAL CARE SERVICE

In 2019 the GM Dental Commissioning Team procured a new Urgent Dental Care service for the population of GM. This service is available for all patients in GM who require to access urgent dental care.

This service can be accessed by calling 0333 332 3800.

There are 14 Urgent Dental Care sites across GM. 1 of these is in Bury.

In response to the pressures caused by the COVID pandemic additional capacity has been commissioned from both the telephony and clinical providers of this service. This additional capacity is in place until March 2023.

IMPROVING ACCESS – URGENT DENTAL CARE (URGENT DENTAL CARE HUBS)

From April 2020, Urgent Dental Care (UDC) Hubs were established across Greater Manchester offering face-to-face dental treatment after remote triage. UDC Hubs are linked with the GM Urgent Dental Care call handling service to receive referrals for patients in pain. The UDC Hubs provide extractions and extirpations (first stage of Root Canal Treatment) to save the tooth that get patients out of pain.

In GM there are currently 42 UDC Hubs. 1 of the UDC Hubs are situated within the Bury locality.

On calling the GM Urgent Dental Care Service patients are able to attend the most convenient urgent dental care provider and are not restricted by local authority or CCG boundaries within Greater Manchester.

IMPROVING ACCESS – GENERAL DENTISTRY

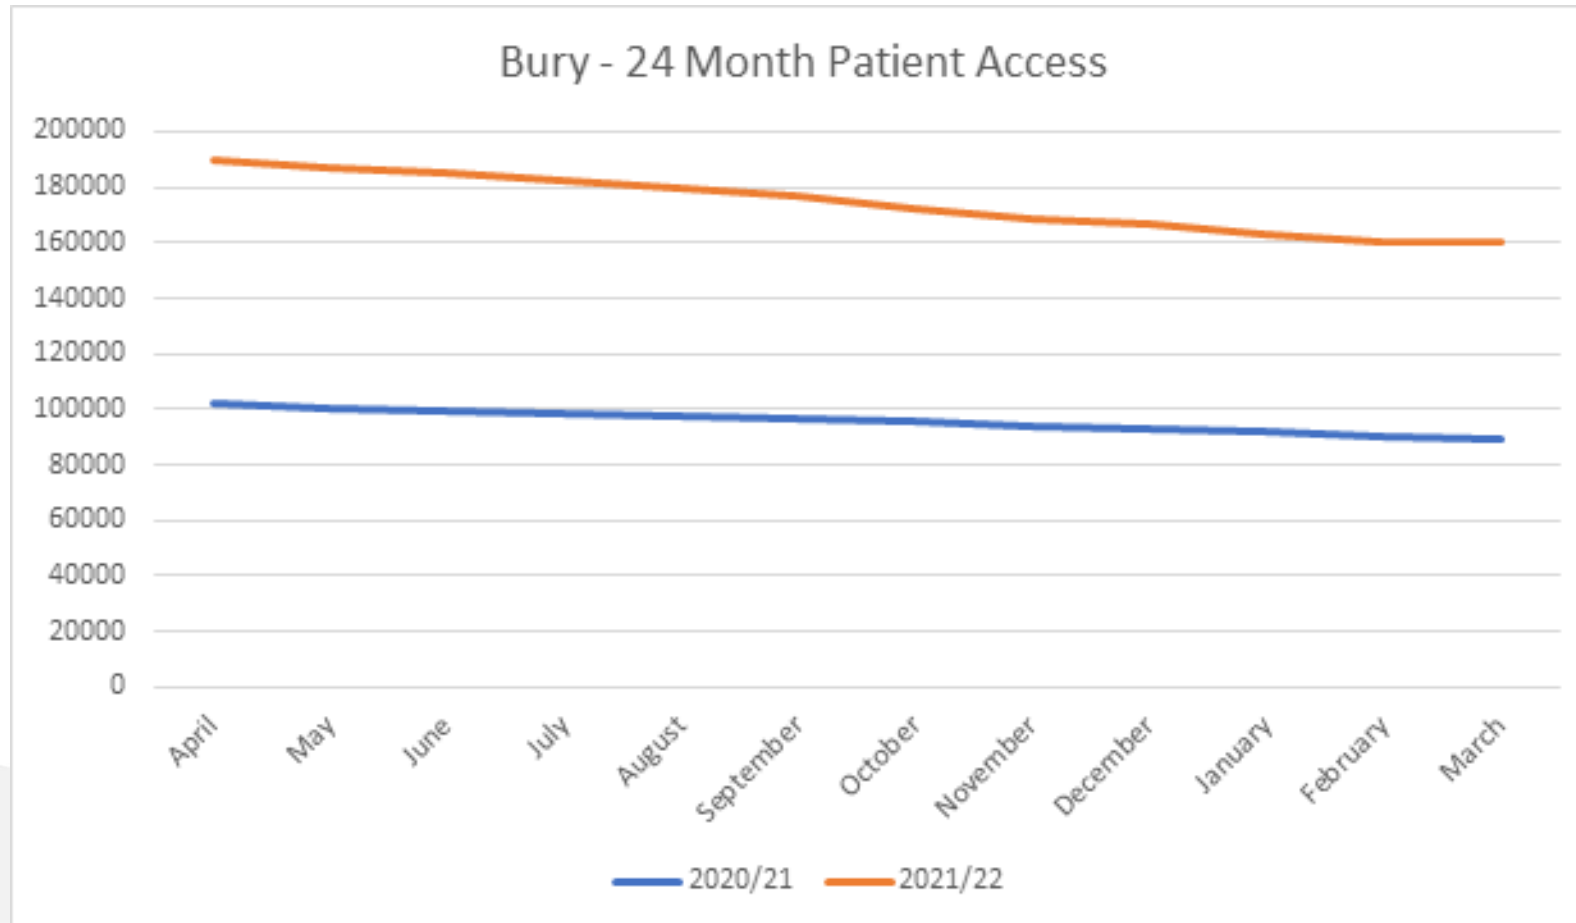

In Bury there are:

- 31 (8.1%) General Dental Services providers
- 1 Tier 2 Oral Surgery provider (10 providers across GM)
- 2 Orthodontic providers (43 providers across GM)

All NHS General Dental Practices continue to prioritise patients in pain, children, patients who are deemed as high risk – such as those receiving treatment for cancer, and those who are mid way through a course of treatment.

Access is still steadily increasing but has not yet returned to pre-pandemic levels.

FIGURE 1: NHS ACCESS TO GENERAL DENTAL SERVICES – 24 Month Patient Access 20/21 & 21/22

RESTORATION OF ELECTIVE CARE – SECONDARY CARE DENTAL SERVICES

Specialist Dental Hospital and also specialist dental services delivered within secondary care.

A key NHS priority is the restoration of all services with a view to returning to a “normal” position as quickly and as safely as possible. Paediatric and Oral Surgery Clinical Reference Groups have been established to lead recovery of elective surgical cases supported by five GM Managed Clinical Networks. The work programme is to ensure patients can receive elective care at the right time, in the right setting and reduce wait times. This includes:

- Population oral health needs assessment and support for the correct coding of specialist activity so it can be monitored and appropriately commissioned.
- Continue to develop e-referral management system with robust clinical triage to direct referrals to the right setting at the right time, including referrals from non-dental professionals with potential use of virtual consultations
- Workforce and training for dental professional are being reviewed to meet current and future needs
- Referrals are made with complete treatment plans so that shared care can be planned and waiting lists validated and care prioritised with patients are seen in the right setting for their dental care need

ADDRESSING INEQUALITIES THROUGH ACCESS TO NHS DENTAL SERVICES

ADDRESSING INEQUALITIES – CHILD FRIENDLY DENTAL PRACTICE (CFDP) SCHEME

Greater Manchester
Integrated Care

- Service development pilots initiated in November 2020. Rolled out to across GM following the successful pilot. To date have 9 providers across GM.
- Children who have been referred for an oral health assessment to a specialist setting (including those referred for dental extractions under general anaesthesia) are instead offered evidence-based treatment at a general dental practices.
- Treatment includes:
 - Prevention – Oral Hygiene Instruction, diet advice, fluoride varnish application, fissure sealants
 - Stabilisation – Silver Diamine Fluoride, Temporary Fillings
 - Restoration – Hall Crowns, Definitive Fillings
 - Extractions
- This primary care service supports our specialist community services for children and reduces referrals and pressures into secondary care.
- Unfortunately, due to unforeseen circumstances and COVID challenges, the practice in Bury which intends to deliver CFDP has had to delay its implementation. Children are however able to be referred into the GM network of CFDP and continue to be referred into specialist services. The Bury practice will be 'live' by the end of July 2022.

ADDRESSING INEQUALITIES – HEALTHY LIVING DENTISTRY PROJECT

The Healthy Living Dentistry (HLD) project continues to be developed and delivered.

There are 70 Practices across GM (currently 1 in the Bury locality) signed up to deliver this quality assured scheme where Dental practices undertake national & local health campaigns, often linked to local GPs & Pharmacies. Plans are in place to begin a further recruitment campaign to encourage all Practices to sign up to this scheme.

All practices have access to training and development which is supported by Health Education England North West and available to be accessed online.

- Practices who sign up to HLD deliver targeted health promotion to specific groups such as:
 - Dementia Friendly Dentistry
 - Baby Teeth DO Matters
 - Mouth Cancer Awareness
 - Sugar free diet and medicines
 - Flu awareness

ADDRESSING INEQUALITIES – A DENTAL HOME FOR LOOKED AFTER CHILDREN

Led by the GM Dental Commissioning Team and Consultant in Dental Public Health linking with Local Authority Teams supporting health care for Looked After Children (LAC), a new referral service has been developed that will support all LAC in Greater Manchester and Cheshire & Mersey to **find a dental home**.

The objective is to seamlessly connect referrals for any child who is looked after with a LAC provider within their locality. In GM we currently have 58 Practices accepting referrals for LAC, 2 of these are in Bury.

The child will be seen and treated and offered regular appointments and re-calls dependent on their oral health risk.

The long-term objective will be to strengthen the links of the Bury Safeguarding Team with Child Friendly Dental Practices to ensure that there is ease of access for all Looked After Children to find a dental home.

ADDRESSING INEQUALITIES – GM ACCESS PLUS SCHEME

Greater Manchester
Integrated Care

Following urgent treatment patients are encouraged to seek definitive care at a high street dentist. Unfortunately, the pandemic has led to a reduction in capacity and patients were struggling to access routine dental care, such as check-ups and the treatment indicated to restore dental health. As a result, patients were then returning to the urgent service with the same problem or worsening problem.

In response to the unmet need as a result of the ongoing challenges we face within NHS Dental services we developed the Greater Manchester Access Plus Scheme which improves access and delivers continuation of care to patients who have received urgent care but who require further care and treatment within an NHS Dental practice. This scheme was rolled out on 1st February 2022.

The GM Access Plus Service will provide a minimum of a one off courses of treatment for adults (18+ years) who have been seen by the GM Urgent Dental Service / UDC Hubs for urgent care that requires further treatment.

Across GM we have 59 practices providing this service, 2 of these are within the Bury locality.

ADDRESSING INEQUALITIES – NATIONAL NON-RECURRENT URGENT ACCESS SCHEME

Nationally £50 million was released to support non-recurrent service capacity between during the last quarter of 2021-2022. This funding was for urgent access.

Across Bury, 5 practices signed up to the National Non-Recurrent Urgent Access Scheme and provided 290 additional sessions between 1st February and end of March 2022. A total of 794 patients were seen at these additional sessions (approximately 9.5% of the additional capacity across Greater Manchester).

ORAL HEALTH IMPROVEMENT

ORAL HEALTH IMPROVEMENT – GM TRANSFORMATION PROGRAMME

- Initial programme support to seek reduction of health inequalities across four original priority oral health areas Bolton, Rochdale, Salford and Oldham.
- Daily supervised toothbrushing in all nursery and reception Early Year settings for children aged 2-5 years.
- Deliver Health Visitor 0-3 years training; support fluoride dental packs distribution at 1 year and 2-2 ½ year checks.
- With the closure of earlier settings and schools during lock down there was a suspension of community based oral health improvement programmes.

ORAL HEALTH IMPROVEMENT – ONLINE TRAINING

In response to the cessation of the delivery of face to face training during the COVID response, the oral health team in the localities, supported development of open access online training packages.

Mouth Care Matters in the community - training material suitable for the wider care team, including care managers and care staff carrying out admissions, assessments and provision of daily mouth care. It ensures dignity and comfort.

Mouth Care Matters in the acute sector – developed to support NHS Nightingale North West and for all nurses and care staff providing and supporting effective mouth care for all hospitalised patients during COVID. Daily mouth care in hospital reduces the risk of infection such as Hospital-acquired pneumonia (HAP), which in turn reduces the length of a hospital stay.

Supervised Toothbrushing in Early Years and Educational Settings - training material intended for early years and education staff who are working with their local health teams to deliver a supervised toothbrushing programme.

ORAL HEALTH IMPROVEMENT – GM TRANSFORMATION PROGRAMME

- Over 58,000 children participated in Supervised Daily Toothbrushing Programme in Greater Manchester since October 2018:
 - 33,307 children in 645 early years settings take part (88.4% of population, in 88% of settings)
 - Engagement highest in most deprived areas - 79% of settings in IMD 1, compared to 72% in IMD 10.
- With VCSE partners, 120,000 most vulnerable children received take home fluoride dental packs during lockdown.
- Programme now planning roll-out across wider Greater Manchester

PATIENT FEEDBACK

PATIENT FEEDBACK – RESPONDING TO FEEDBACK

The national NHSEI Customer Contact Centre (CCC) has received a large number of general enquiries about dentistry, with Greater Manchester area receiving the largest reported numbers of patient enquiries. The main themes include not being able to get an appointment, patients being told that they must pay for PPE on top of the NHS banding, or patients being told that they cannot be seen in the NHS but can be seen the same week privately.

Although a large number of enquiries are being received, these are not being taken forward as formal complaints and are generally dealt with informally. It is also recognised that the reported regional areas are not comparable in size or service provision.

The GM Dental Commissioning Team is working in conjunction with the Local Dental Committees to ensure adherence to national guidance in service delivery; and NHS Greater Manchester Communications Team to develop a suite of communications assets shared across all our partner organisations detailing what is currently available, how patients can access services, and what to expect when attending.

The GM Dental Commissioning Team continues to support the GM Complaints team with advice and written responses to all patient enquiries, complaints, MP enquiries, and enquiries from the Mayoral Office.

PATIENT FEEDBACK – HEALTHWATCH

All Greater Manchester Local Dental Committee (LDC) Chairs have committed to engaging with local Healthwatch Officers to ensure that there is clear communication and understanding of any issues that are highlighted by clients.

LDC Chairs have agreed to attend local Healthwatch meetings, and it has been agreed that a Healthwatch representative from GM is invited to attend the Dental Provider Board to provide a report on behalf of the 10 Healthwatch organisations.
