

Equality Impact Analysis

This equality impact analysis establishes the likely effects both positive and negative and potential unintended consequences that decisions, policies, projects and practices can have on people at risk of discrimination, harassment and victimisation. The analysis considers documentary evidence, data and information from stakeholder engagement/consultation to manage risk and to understand the actual or potential effect of activity, including both positive and adverse impacts, on those affected by the activity being considered.

To support completion of this analysis tool, please refer to the equality impact analysis guidance.
