## **DESKTOP REVIEW COMMENTS (01/06/15)**

- Bluetooth data shows delays during AM and PM peaks.
- Saturday operation presumably due to football matches.
- Need signal green times.

#### ON SITE REVIEW COMMENTS (29/06/2015)

- Setback distance from traffic signals:
  - 81 metres from signals at Radcliffe Road junction
- Downstream features:
  - Pedestrian crossing
  - Signalised junction (MOVA)
- Signing / Consistent TRO:
  - Enforced
- Bus stop locations:
  - At end of bus lane
- Correct bus lane length for successful operation:
  - Queuing past start of bus lane on rare occasions, acceptable
- District comments:
  - Potential Saturday match day and shopping traffic issues
  - Does not attract a significant level of complaints
  - Drivers tend to use lane 1 as lane 2 quickly becomes right turn
  - Issues with lane merge, not standard arrangement only real issue
- Overall effectiveness / Recommendations:
  - No real reported problems, no changes required
  - Possibly peak periods only
  - Move termination point of bus lane back and relocate bus stop south, new carriageway alignment at end of the new 'setback bus lane'

## **OPERATOR COMMENTS (15/07/2015)**

- Positioning of the bus stop at the end of the bus lane isn't ideal.
- The end of the bus lane could be realigned.
- Current operational hours could be amended to peaks only and is reflected in the Bluetooth data.
- Days of operation need to include Saturdays due to the proximity of the football ground.

#### **RECOMMENDATIONS (16/07/2015)**

- Move end of bus lane location further back approximately 20 metres.
- Relocate bus stop south.
- Realign the kerbline.
- Potential for bus lane to be operational Mon-Fri in the AM and PM Peak only, then Sat ALL DAY however during the workshop discussion it was deemed that this could lead to driver confusion.
